

## Cell Siphoning Lifting Beam

- Siphoning lifting beam with innovative gripper system for increased capacity crucibles.

### BENEFITS

- Facilitates increase of amperage
- Minimised dead weight
- Ultra light equipment without counterweight
- Use of existing overhead crane
- Increased crucible capacity
- Ultra-thin gripper system
- Increased integrated security

### TECHNICAL FEATURES

- Design with minimum weight so as to not compromise a safety factor of 10
- Innovative balancing system without use of counterweight
- Control box integrated to the lifting beam
- System of locks and indicators with integrated "failsafe" security

\*\* Increase your productivity with our siphoning lifting beam by using an innovative lifting point mechanism, which will allow the use of wider, higher capacity crucibles to carry more metal.
