

DYNASKIM

— Advanced Multitasking Robotic Skimmer

Highly efficient, reliable and safe multitasking robotic skimmer designed to reduce, remove and dispose of dross while minimising metal losses

BENEFITS

- Increased skimming efficiency
- Reduction of metal content in dross
- Unparalleled reliability of the operation
- Reduced OPEX thanks to automation and multitasking functions
- Increased security; no more personnel exposure to molten metal
- Reduced dross management costs
- Custom integration to existing casting equipment

TECHNICAL FEATURES

- Automatic preheating of skimming tool
- Automatic change of skimming tool
- Built-in robot thermal protection
- Multifunction option for use with other tools (metal sampling, dross removal, and more)
- Integrated dross removal system
- Option: Vision system for efficiency control
